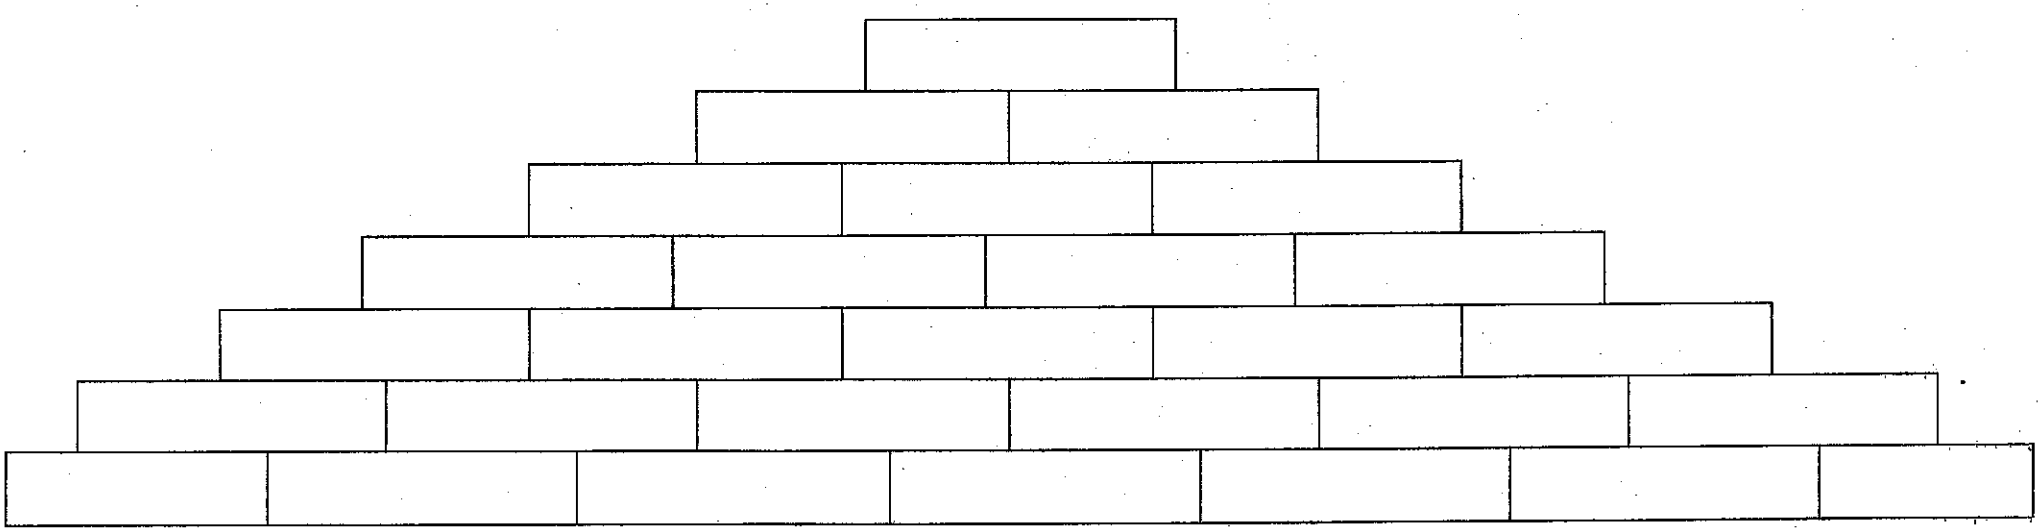
My Earth Science Pyramid

Create a pyramid of key terms and concepts using the clues below. Each box can only contain one word! After you've completed the pyramid, color and decorate your work!

1. Name the scientist who developed the theory of continental drift
2. Name the theory that states the all of the Earth's plates ~ oceanic and continental ~ are moving
3. Name the three types of plate boundaries
4. Name four landforms that can be caused by plate movement
5. Name five of the seven major plates
6. Name the six layers of the Earth
7. Write a sentence describing why the plates move.


Name:_____Date:_____Period:_____
