Jaxsen Zajac

Computer System Configuration and Support Security, Specialization II

Focuses on the development of knowledge and skills in computer and security technologies including system components, installation, system configuration, peripheral devices, and notebooks.
Emphasis is placed on preventing, identifying, and mitigating threats to the security of information systems and utilizing the basic tools for information security.

Students
please head to the back with your certificates for pictures!

Refreshments are also in the back for guests and students.

Thank You
