Write In Your Agenda:

CW:

- Geology Final Part 1.
- “It’s Not My Fault: A Look at Transform Boundaries” Activity.

HW:

- None.

Write In Your Monitoring Log:

Warm-Up Prompt:

Why do scientists now accept the Theory of Plate Tectonics rather than Continental Drift?

You will need:

- Pencil
- Agenda
- Monitoring Log
- Privacy Folder

Learning Goal and Scale

- *TSW understand how the Earth's natural processes have shaped its landscape (including Lithospheric Plates and their movement, Convergent, Divergent, and Transform boundary landforms).*

Topic-Specific Rubric for Lithospheric Plates
4—The student has a complete and detailed understanding of the information important to the topic of lithospheric plates including what a lithospheric plate is, connections to convection currents, the accepted and denied theories associated with lithospheric plate movement, and scientific evidence of plate movement. The student is also able to make connections between all the concepts and evidence.
3—The student has a complete and detailed understanding of the information important to the topic of lithospheric plates including what a lithospheric plate is, connections to convection currents, the accepted and denied theories associated with lithospheric plate movement, and scientific evidence of plate movement.
2—The student has an incomplete understanding important to the topic of lithospheric plates (including scientific evidence and theories). However, the student still has a basic understanding of the topic with some missing key information.
1-- The student's understanding of the topic of lithospheric plates (including scientific evidence and theories) is so incomplete and/or there are so many misconceptions that the student does not possess even a basic understanding of the topic.
0—No judgment can be made about the student's understanding of this topic.
