

Observations!

Name: _____

Part 1: The Rise and Fall of Raisins

1. **Knowledge:** Define observation.
2. Read your task card and prepare to complete your assigned task.
3. Get 150 ml of fizzy water from your teacher.
4. Add the raisins.
5. **Application:** Record your assigned observation on your task card.

Part 2: List, Group, Label

1. Meet with your color group in the assigned area of the room.
2. Create a list of the observations from your color group in the table below.

Group 1:	Group 2:
1.	1.
2.	2.
3.	3.
4.	4.
5.	5.

3. Return to your lab table and share your lists. Be sure to record the observation lists from both color groups in the table.
4. **Analysis:** Create a title for each list based on similarities. Write the title at the top of each list.
5. **Evaluation:** Describe your reasoning for each title. What criteria did you use to categorize your observations?

At the Scene of the Crime

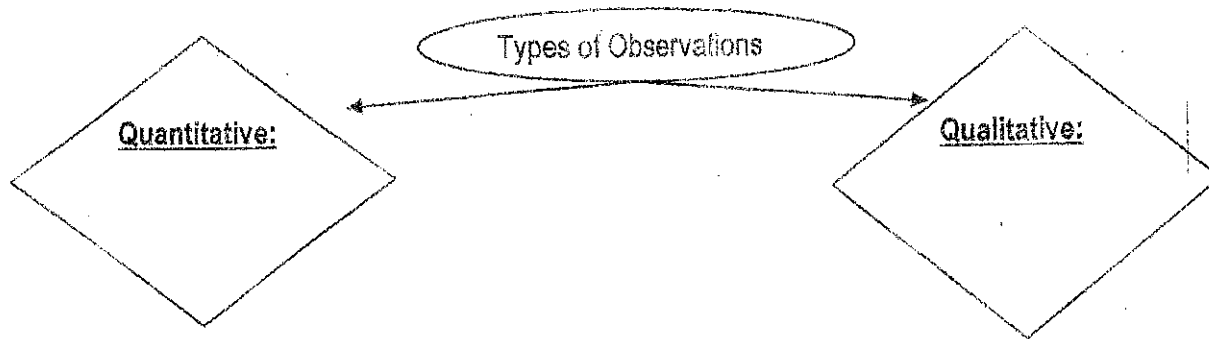

Part 3: Observe the picture of the crime scene provided by your teacher. Write down any details that seem important to you, an eyewitness of this crime.

My Notes/Observations:

Part 4: Answer your teacher's questions based on your notes.

Observation Notes: Record notes as your teacher discusses two types of observations in science.

Application of New Knowledge:

1. Refer back to your definition in part 1. Make additions as necessary to make your definition more complete! Refer back to your group 1 & group 2 labels in Part 2. Modify your titles as needed to reflect your new knowledge!
- 2.

Synthesis: Exit Ticket Chose one object in this room and write down two qualitative and two quantitative observations about it. Hand the paper to your teacher as your ticket out the door today!

Object:

Qualitative:

1.

2.

Quantitative:

1.

2.
