

Putting it All Together

Task: To put our vocabulary terms together into a poster.

Requirements:

1. You must create one large drawing that includes all of the vocabulary terms below.
2. The terms should be shown as they occur in real life (ex. Volcanic mountains should be drawn in your picture where a Continental plate and Ocean plate are coming together with subduction)
3. ALL terms must be included in the picture. ~~My hint to you is to create a very large circle representing the earth and draw the vocabulary terms on the surface (except layers terms).~~
4. It needs to be colored with colored pencil
5. Label each vocabulary term.
6. **On the back, choose 5 of the terms and discuss what they are and how you represented them in your poster.**
7. It is DUE TODAY. You may not take it home for homework. This means you will have to work hard for the entire period.
8. You have a very large piece of paper. Don't leave white spaces!
9. An example of part of it is below. Please do not just copy this drawing!

Refer to diagram
on pages
152-153

*This is just one section. Creating a whole circle to represent the earth may make it easier to fit everything.
