

Roll the phase!

Directions:

Cut out the lunar phase dice. Fold the tabs down and fold down all the lines. When your dice takes form then glue the tabs to the corresponding surfaces. Use only a small amount of liquid glue. Hold for at least 5 seconds.

How to play:

This game can be played alone or in as large a group as your choose. Roll the dice and try to figure out which phase was before and which phase will come after. For an even greater challenge try figuring out the two phases before and after or the opposite phase.
