

# Cornell Notes - The Lorax

Name: \_\_\_\_\_

Producers:

Consumers:

Limiting Factors:

Non-native Species:

Issues

that arise:

Endangered Species:

Summary of Science & Seuss:

## Connection Questions:

1. Who do you think the Lorax is/represents?
2. The Truffula Trees are producers. List organisms that depend on the trees. Tell why they depend on them.
3. What other kinds of products are marketed as a "fine-something-that-all-people-need?" Can you give an example?
4. What inventions do people use to make life easier? What effect do these inventions have on the environment?
5. What happened to the environment as the Thneed business got bigger and bigger? Where do we see this happening in our own world?
6. Why did the Lorax leave?
7. What can you do to balance the need for all living things to have food, water, and shelter with human wants and needs?
8. Why did the Lorax leave the word behind, UNLESS? What does it mean?
9. Describe the human impact on the Truffula Tree Forest.
