What's Eating You?

Use the key below to write a code for each of the organisms.
The spider's code has already been written into the table.
Description	Number
Carnivore	1
Herbivore	2
Omnivore	3
Producer	4
Consumer	5
Predator	6
Prey	7

Organism	Food Source	Code	Organism	Food Source	Code
Snail	Leaves		Rabbit	Plants	
Spider	Insects	1567	Wheat	Photosynthesis	
Robin	Worms, seeds		Frog	Insects, worms	
Honeysuckle	Photosynthesis		Shrew	Worms	
Thistle	Photosynthesis		Ant	Aphids	
Caterpillar	Honeysuckle		Heron	Frogs	
Mouse	Wheat seeds		Adder	Mice, frogs	
Badger	Shrews		Rat	Small animals/plants	
Fox	Rabbits/birds		Hedgehog	Insects/worms	
Rose plant	Photosynthesis		Aphid	Rose plants	
Worm	Rotting leaves		Cat	Mice, birds	
Human	Animals/plants				

Here is a food chain.

Mushroom ——is eaten by——> snail ——is eaten by——> bird ——is eaten by——> fox

Using the organisms from the table answer the following questions on the back.

1. Create 5 *different* food chains.
2. What is the longest food chain you can make? Why?
3. What happens when you add an omnivore to a food chain?

Niche Acrostic
