Research Questions

What are the effects of video games on children's behavior (e.g., aggression)?

Violent video games are more likely to be consumed by children who play video games more often than their peers.

Research Question: Are children who play video games more violent than their peers?

What effects do violent video games have on 3-18 year olds in the U.S. over the last 10 years from 2000-2010?

Narrow Down Your Topic: Example #1

- If your RQ is a prepositional question, you have not found your topic yet.
- Research questions should be specific as possible.
